TM 1000 TaskMaster

Versatility
Now you can have the versatility to clean the air all around your shop with just one power source, and your choice of multiple attachments. Choose the attachment best suited for the job.

Broad Choice of Attachments
Select only the attachments that fit your applications. When conditions change, no need to buy another air cleaner, just add an attachment. Maximum versatility ensures maximum return on your investment.

Low Power Requirements
The TM 1000 can be used anywhere 120v single phase electricity is available. Just plug it in, no special wiring needed.

High Capacity Cleaning
New highly efficient high-capacity motor-blower assembly provides 1,000 cfm, nominal performance in a very compact, portable power unit. The TM 1000 simply offers more cleaning capacity than other units similar in size.

Compact Design
The power unit is contained within a trim 25 1/2" x 32 1/2" footprint, so it can be maneuvered in tight areas where limited access is available. The TM 1000 is ideal for maintenance and source capture applications where temporary pollution control is required.

Dual Self-Cleaning Cartridges
Exclusive Roto-Pulse® high efficiency cartridge cleaning system assures that cartridges clean your air at top efficiency.

Wide Range of Filter Options
Choose the filter options that meet your needs: H0 Spunbound; 99.97% HEPA afterfilter to control minute particulate; activated charcoal modules to control odor.

Articulated Arms
Four sizes available - 6" or 8" diameter, 7' or 9' length.

Downdraft Table
Handy working surface for welding and grinding - 24"W x 18"D.

Backdraft Hood
Easy way to capture smoke, dust, fumes at a work station - 24"W x 12"H.

Dual Articulated Arms
Conveniently sized 4" diameter, 5' or 7' length.

Long Reach Flex Hose
Reach across obstacles or into tight areas - 15' or 25' lengths with removable hood.
Quality engineering and construction mean high performance, maximum value.

TM 1000 tackles air cleaning jobs all around your shop with just one power unit.

Downdraft attachment easily mounts to slide rail on cabinet.
We meet the specs for all your air cleaning needs.

Exclusive Roto-Pulse® Cartridge Cleaning System.

How does it work? Air is pulsed into a specially designed stainless steel rotating tube with pre-drilled holes. As the air enters this tube, the force of the pulse causes the tube to rotate. While spinning, air exits the pre-drilled holes. The result is that air hits the entire inside of the cartridge, pulsing dirt particles away from the filter for an efficient cleaning cycle.

Micro Air Systems...
Meeting all your clean air needs.
